

PLAY.  
LEARN.  
COMMUNICATE.®

## BENEFITS

- Course design integrates simulations and game mechanics to meet learning objectives.
- Challenges learners to achieve maximum score at each level, and progress to higher levels.
- Learners get immediate feedback through the responses of the virtual characters.
- Detailed assessment clearly illustrates where learners need to improve, providing motivation to improve.
- Contextualized practice facilitates skill transfer to real world situations.

# TI SIMULATOR

*The Tactical Interaction (TI) Simulator is Alelo's best example to date of serious gaming and role-play simulations applied to language and culture training.*

## FEATURES

- Incorporates 3D virtual world simulation to instruct and assess mission-critical language and culture skills.
- Realistic simulations of common interactions learners would have with the local population that can be played at progressive levels from cooperation to hostility.
- Multiple levels of difficulty ensure that learners are playing at an appropriate skill level, then progress to higher levels.
- Developed in partnership with the Australian Army Simulation Group and the Defence Force School of Languages (DFSL)\*.

*\*Initial TI Simulator developed for the Tetum language (spoken in East Timor).*
