PRESS RELEASE

Primed by Calytrix Technologies, Army contract provides latest opportunity to deploy Alelo's simulation technology for enhanced soldier training.

Los Angeles, CA (October 17, 2013) - Alelo Joins Team Providing Games-Based Training System to US Army

Alelo Inc. has partnered with Calytrix, Bohemia Interactive Simulations (BISim) and SimCentric Technologies to provide a flagship games-based training system for the US Army. The "Games for Training" (GFT) system will leverage Alelo's patented VRP® technology in creating interactive simulations as part of mission-critical training for Army warfighters.

Integrating with BISim's upcoming enhanced Virtual Battlespace 3 platform, Alelo's Virtual Role Players add non-kinetic, culturally accurate interactions to the simulated battlefield training environment. President and CEO Dr. Lewis Johnson said, "We are very pleased to be part of the Games for Training team. Non-kinetic skills training is an important new frontier for virtual training, and we look forward to offering this critical capability as part of VBS®3."

The complete software package being fielded for GFT includes BISim's VBS®3 virtual training environment; SimCentric's VBS®3 Fusion, VBS® Fires module and Pattern of Life; and Calytrix's LVC Game HLA/DIS gateway, CNR Sim Pro, CNR Log, and CNR Effects communication software.

Games for Training is expected to become available in late 2013/early 2014, and Army warfighters will have access to this next generation of game-based training technology over the next five years.

About Alelo Inc.
Named for the Hawaiian word for "tongue" or "language," Alelo is dedicated to helping people throughout the world communicate more effectively. A spin-out of a research project at the University of Southern California's Information Sciences Institute, Alelo has been highly successful in transitioning research results into effective products. Alelo creates software and content for instructional social simulations for a wide range of domestic and international markets (Government, Military, and Education), and is growing its suite of training solutions to satisfy the needs of the commercial markets.
