

Avatar-based AI Revolutionizes Remote Education

Teach more effectively online at lower costs in the COVID era.

*Artificial intelligence
role-playing for
student learning*

Enter Enskill® Ed from Alelo

Enskill Ed is an avatar-based AI solution that enables your institution to effectively conduct remote classes at lower costs – and with superior results.

Effective Remote Learning – at Lower Costs

With Enskill Ed, students engage in interactive online conversations with socially intelligent virtual humans. They practice on their own as often as they like on a mobile device, desktop, or virtual reality headset. Students receive immediate feedback and personal instruction in areas where they need to improve. It's like having a personal tutor, available at any time, but at a cost that is significantly less than in-person instruction.

Enskill Ed delivers online learning that is:

- ✓ More Effective
- ✓ Measurable
- ✓ A Fraction of the Cost*
- ✓ Personalized and Engaging
- ✓ Easily Scalable
- ✓ Cloud-Based
- ✓ AI-Driven

*Compared to in-person classroom instruction.

Meet the future: Alelo Enskill® Ed

CUSTOMIZED AVATAR-BASED AI EDUCATION THAT
IMPROVES ONLINE LEARNING WHILE LOWERING COSTS

Teach Any Subject Online

*Teach students online more
effectively at a fraction of the cost*

Role-playing with avatars is an effective teaching method for a wide variety of subjects and has been shown to keep students motivated. Automated assessments accurately measure each student's performance. Teachers and administrators retain control by monitoring student progress and identifying those at risk of falling behind.

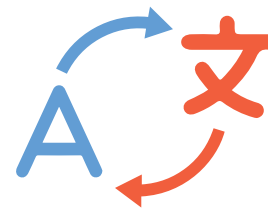

English Language Education

*Improve student English
language proficiency*

Ensure your students' verbal and written English skills are ready for the global workforce. Simulations with avatars assess and train English skills required for employability under CEFR, ILR and ACTFL international standards. Enskill® English has been used in 21 countries but can also be used to teach ESL and ELA students in the U.S.

Free trial available!

Foreign Language Education

*Improve student foreign
language proficiency*

Students become proficient at a foreign language as they role-play with AI avatars, then get personalized feedback on their performance. Avatars reflect the culture, behavior, and gestures of the language, providing deeper language immersion for students. Alelo's language team has experience with over 100 cultures.

Employability Skills Training

*Prepare your students for
today's workplace*

Develop and assess the necessary soft communication skills and job-related competencies your students need to be successful in today's workplace. Students converse with avatars to learn the communication skills necessary for effective sales, customer service, collaboration and team leadership.

Whatever your educational needs, Alelo can create a solution

For over a decade, Alelo has been the leader in avatar-based learning for academia, government, and enterprises. Alelo's avatar-based learning has been used in 25 countries and 100 cultures. Alelo's team combines experience in state-of-the-art AI technology with deep research into effective communications and a thorough understanding of the demands of academic institutions. Let us tailor a solution to your educational needs.
